The Bullet Phase 3000 mAh Wireless Power Bank has a rechargeable lithium polymer battery for charging smartphones, MP3 players, and a variety of other devices. It also features wireless charging. To charge phones without wireless technology, an external Qi-standard wireless charging receiver or receiver case is required. This device will work with any smartphone without wireless charging technology through its normal power bank capabilities. The Phase Wireless Power Bank also comes with a Micro-USB-to-USB charging cable that can be used to recharge the power bank or to charge devices with a Micro-USB input. Works with most plastic phone cases or covers on. Power banks are permitted in carry-on luggage only, and at the discretion of TSA agents. Please charge power bank before initial use.
